## SIRIUS ACT – Performance in Action

Exquisitely beautiful Push Buttons and Signaling Devices –  
easy to assemble, ruggedly reliable, simply brilliant

[siemens.com/sirius-act](https://www.siemens.com/sirius-act)

# Performance in Action – for Push Buttons & Signaling Devices

Powerful machines need powerful controls. SIRIUS ACT offers you a unique portfolio of elegantly designed push buttons, indicator lights and switches that are the perfect embodiment of style, intelligence, and physical toughness.

Constructed with genuine metal and high-grade plastics, engineered with smart functions and communication capabilities, these new push buttons, indicator lights and switches have been extreme element tested to ensure reliability for your most mission critical operations.

## Modern design

---

Elegant product design and high-quality material – as a distinguishing system design feature.

## Easy to use

---

From configuration to installation, SIRIUS ACT takes the concept of sophistication in simplicity to the next level.

## Extremely rugged

---

Reliable. Especially when things get rough. IP69K is our new standard.

## Flexible communication

---

Whether standard wiring or direct connection to the controller – SIRIUS ACT offers flexibility via AS-i, IO-Link and Profinet.

Design

## Modern design

Our Performance in Action promise doesn't just stop at the design. The flat, round metal and plastic elements combine unparalleled functionality with a timelessly esthetic look. Four design lines and diverse options for combining actuator and indicator, material, color, the type of front ring and lighting make the push buttons, indicator lights and switches look like they had been specially designed for your system. Therefore, offering the right answer for every application, taste, and budget.

« Four design lines

The new "metal matte" units also in a flat design.

IP69K is our new Standard -  
the highest degree  
of protection »

Even suitable for cleaning  
with a high-pressure jet at  
high temperatures.

Ruggedness

## Rugged reliability

Functionality is preserved not only when dust or water under high pressure are involved, even oils, caustic solutions and extreme environmental influences cannot disrupt reliable operation. Thus, SIRIUS ACT is the perfect solution for a host of applications.

« Direct connections to the controller (PLC)

Communication solutions for the field and the control panel

Modular design »

Actuator, holder and contact blocks can be ordered individually and combined freely

Communication

## Flexible communication, tough and intelligent

When it comes to communication, SIRIUS ACT is a strong performer. Besides the standard wiring, you can also connect these push buttons, indicator lights and switches directly to the controller – in the field via AS-Interface or in the control panel with IO-Link. By doing so, you can reduce wiring time and effort, minimize error source and have more flexibility for future modification and expansions. Interfacing to PROFINET is also just about to become reality for SIRIUS ACT.

**Installation**

# Installation has never been easier

Innovative snap-on concept makes the task of installing a unit so effortless that it can be done with one hand. With 100% twist prevention integrated into the holders, SIRIUS ACT can be installed in groove-free milled holes, saving you significant installation time. In addition, visible installation markers and indicators on components further reduce risk of incorrect installation.

# Impressive features

## Easy to select and use

---

### Intuitive online configurator

- User-friendly drag and drop configuration
- Graphical preview of selection
- Easy identification of a customer-specific configuration by CIN order number

### One-handed installation without special tools

- Components can be snapped on without having to hold the other side
- Installation also possible in a slanted position

### Twisting prevented by screw fixation

- Simple round milled holes without a groove
- Significant time saving compared to ring nut fastening

### Modular concept

- Actuator, holder, contact blocks and LED modules can be ordered individually and combined freely
- Contact blocks can be stacked onto one another

### Reduced ordering and storage complexity

- Illuminated/non-illuminated selector switch can be used (one part number only)
- Top-selling models can also be ordered as complete, compact units (electrical parts permanently connected)

## Extensive portfolio

---

### Broad product range

- State-of-the-art functions such as ID key-operated switches, sensor switches, potentiometers, etc.
- Customized variants, such as special tumbler arrangements, labeling, equipped enclosures
- Communication-enabled thanks to direct interfacing to AS-Interface, IO-Link or PROFINET

### Diverse possible applications

- International certifications and approvals
- Short delivery times thanks to global availability

## Rugged in use

---

### Highest degree of protection (IP69K) throughout

- Media resistance (chemicals) thanks to solid stainless steel and high-grade plastics
- High reliability for fail-safe operation
- Long service life
- Extended industrial application in harsh environments
- Suitable for outdoor use

### LED light sources

- Reduced energy consumption
- Long service life
- Low maintenance costs
- Different LED colors for individual color scheme

### Secure attachment even under extreme stress

- High reliability for fail-safe operation
- Low maintenance costs
- Permanent twist prevention

### ATEX certification (optional)

- Can be used in hazardous areas

## Modern design

---

### Four design lines

- Suitable and practical for every demand
- New: flat, matte front design for stylish systems

### Homogeneous lighting

- Clearly recognizable signals thanks to use of state-of-the-art LED technology

## Configuration made easy

With the SIRIUS ACT Configurator you select the suitable push button, switch or signaling device intuitively. Enclosures and labeling can be combined individually to suit specific application needs. Graphics-based component selection with a drag and drop function and selection preview, making it easier than ever to select and order the product you need.

Using the automatically generated CIN number, you can order your enclosure configuration at any time again without the need to enter additional data. The configurator also offers you the complete set of documentation, including exploded drawings and terminal diagrams for downloading.

The information provided in this brochure contains merely general descriptions or characteristics of performance which in case of actual use do not always apply as described or which may change as a result of further development of the products. An obligation to provide the respective characteristics shall only exist if expressly agreed in the terms of contract.

All product designations may be trademarks or product names of Siemens AG or supplier companies whose use by third parties for their own purposes could violate the rights of the owners.

Siemens provides automation and drive products with industrial security functions that support the secure operation of plants or machines. They are an important component in a holistic industrial security concept. With this in mind, our products undergo continuous development. Consequently, we recommend that you regularly inform yourself of any updates to our products and use only the current versions. You will find information at: <http://support.automation.siemens.com>  
You can register there to receive a product-specific newsletter.

To ensure the secure operation of a plant or machine, it is also necessary to take suitable preventive action (e.g. cell protection concept) and to integrate the automation and drive components into a state-of-the-art holistic industrial security concept for the entire plant or machine. Third-party products that may be in use should also be considered.
